

Wound Sheet

Full Thickness Repair

Patient History:

91 y/o female diagnosed with melanoma of the hand. Melanoma dissected with margin leaving a treatment area of 3 cm x 7cm. MatriStem Wound Sheet applied in place of split thickness skin graft.

Features & Benefits:

- Porcine basement membrane promotes rapid wound epithelialization
- Several collagen types and essential proteins support natural tissue healing
- Remodel and restore surgical site effectively to normal state and function
- Two-year shelf life
- Store wound sheet at room temperature

Indications:

MatriStem Wound Sheet is intended for the management of wounds including: partial and full-thickness wounds, pressure ulcers, venous ulcers, diabetic ulcers, chronic vascular ulcers, tunneled/undermined wounds, surgical wounds (donor sites/grfts, post-Mohs surgery, post-laser surgery, podiatric, wound dehiscence), trauma wounds (abrasions, lacerations, second-degree burns, and skin tears), and draining wounds.

Full Thickness Repair

One week post surgery, full thickness remodeling initiated. Patient exhibits minimal inflammation and pain.

Four weeks post surgery, wound is nearly closed with pigmentation returning to remodeled area.

Two months post surgery, full thickness remodeling near completion. Patient has complete range of motion.
